Week 6 Homework

1. Answer the questions in `relativePath.md`.

   Make a copy of the file with your name in it, and upload to the homework folder.
2. Document how to do a thing using GitHub Flavored Markdown.

   - Include different headings
   - Include a table.
   - Include links (internal or external) (A linked TOC works)

   Make file(s) with the `.md` extension in the homework folder. You can make a subfolder if that's easier (i.e. you have multiple files).

Optional thought: DITA can take markdown as an input. You may be able to eventually combine assignments.
